

System 6 Judging Terminals

for Diving and Synchronized Swimming

Judging Terminal

Make your diving and synchronized swimming events run more efficiently. Colorado Time Systems offers a useful addition to your System 6 Diving and Synchronized Swimming packages. CTS Judging Terminals allow the judges to enter their scores from the judging stations eliminating the need for runners when your judges are placed around the pool. They also eliminate the inconvenience and chance of error when having to manually enter scores from the System 6 timing console.

The JTs are easy to install. Simply place up to ten judging terminals at the judging stations, route the cables to the Judging Interface box and insert the cable connectors into the jacks in the I/O box.

The console is a tactile, sealed keyboard with a 0.5" liquid crystal display for easy use. It is powered through the System 6's external power. The dimensions are 11.45" (29.1cm) w x 5.75" (14.6cm)h x 1.5" (3.8cm) d.

Colorado Time Systems is the Official Scoring Display Systems Supplier to United States Diving and Synchronized Swimming.
